

Quality and Environmental Principles (Corporate Policy) of Abfallbehälter & Container Weber GmbH & Co. KG

- Quality is the basis for all services provided by our company.
- We commit ourselves to maintaining, developing and improving the quality and environmental management system and to fulfilling applicable requirements.
- The satisfaction of our customers is the benchmark for the quality of our products and services.
- Our aim is to be a competent partner through reliability, delivery reliability, flexibility, close communication and professional advice.
- Through continuous and consistent improvements, we offer timely solutions to problems.
- These standards also apply to our suppliers, whom we bind to us through long-term partnerships.
- Every employee of our company contributes to achieving these objectives.
- Protecting our environment and conserving all resources are part of our objectives. We therefore pursue a forward-looking environmental and energy policy.
- The company commits itself to the continuous improvement of its processes.
- The production process and the products themselves are environmentally friendly.
- Production causes no wastewater, no gaseous emissions and only low noise emissions.
- The raw material polyethylene is used in a closed cycle.
- All products are manufactured with a high level of environmental compatibility and are 100% recyclable.
- EU requirements regarding noise emissions when handling the products are complied with (EU Directive 2000/14/EC).
- The company commits itself to complying with environmentally relevant regulations and to preventing environmental pollution.
- The company takes energy-saving technologies into account.
- The company's energy consumption is recorded and regularly evaluated and reviewed.
- Energy efficiency is optimized through consistent energy management.
